Break the Cycle of Children's Mental Illnesses

Children are caught in a cycle of limited access to care, delayed treatment, and worsening illness. Our goal as Child & Adolescent Psychiatrists is to BREAK THE CYCLE by investing in research, helping children get treatment, increasing awareness, and ending the needless sense of isolation. This summer Dr. Andrés Martin will cycle from Washington State to Washington, DC, leading a ride to raise awareness of the challenges faced by children and adolescents with mental illness.
